What's Happening at BalanceLogic

BalanceLogic Helps Our Clients Weather the Storm

The storm on June 29th left most of our area without power and many small businesses suffered downtime and some data loss. Even though their power was restored by Monday, some were still unable to run their businesses.

One of BalanceLogic's Healthcare IT clients, Southern Maryland Orthopaedics and Sports Medicine Center, however, was virtually unaffected by the storm. With offices in Waldorf and Leonardtown, how was this possible? SOMD Orthopaedics relies on BalanceLogic's IT support and services to ensure their network and computers are always available in order to continue to conduct business. Due to the dedication of our support staff, SOMD Orthopaedics was back to business as usual on Monday morning and didn't miss a single appointment.

BalanceLogic Partners with Wilson Bradley

BalanceLogic is proud to announce a partnership with Wilson Bradley Career Company to provide students with an internship to learn about their field of interest before choosing a college major. This allows the students to experience what it's like to work in a specific field within a business environment.

BalanceLogic CEO to Teach Corporate Training Classes at CSM

Our CEO Bill Campbell has been selected by the College of Southern Maryland to teach a variety of corporate training classes at all three of their campuses. The first of these classes will be held on July 17th, 18th, and 19th and the topic will be Communicating with Tact and Diplomacy. For more information or to register, please visit CSM's website.

SUGGESTION BOX

We are very interested in hearing feedback on how we can make *The BalanceLogic Insider* more valuable.

Please let us know what you expect from this newsletter each month by sending an

Will you be ready when disaster strikes?

With summer comes the threat of severe storms and the worry of whether or not your business' data is safe. If you have a power surge, will you lose everything? With the support of BalanceLogic's committed technical support staff, all of your company files can be automatically backed up and stored at a secure offsite location. This will prevent data loss in the event of a disaster and provide you with peace of mind.

Thinking of donating your old computer?

Have you ever wanted to donate your old computer, but not the information stored on it? Just deleting the information or formatting the hard drive does not erase the data permanently and the next person who uses the computer may have access to your personal files. BalanceLogic offers single and triple pass data hard drive wiping technology services that meets and exceeds Department of Defense standards. A triple pass wipe ensures that none of your data can be retrieved by the next owner or user of your donated computer, keeping you and your personal information safe.

You can learn more about our data destruction services by visiting our [website](#).

Monthly Tip

Severe Weather Checklist

Just the thought of having a catastrophic storm is enough to keep any business owner awake at night. Being prepared and having a plan is just the first step in surviving the next storm.
